Used primarily at the point of care, UpToDate is available online via computer or mobile device. With a subscription or site license, clinicians can access more than 13,000 topics (including text, graphics, and links to more than 568,000 references), graded recommendations, a select drug database and drug interactions tool (in partnership with Lexicomp®), calculators, and patient information.

More than 7,500 physicians, internationally recognized as leaders in their fields, write UpToDate topics. The content incorporates findings drawn from more than 460 journals, our physicians' collective clinical experience, and recommendations based on the best available evidence. UpToDate topics undergo rigorous peer review and are updated continuously to ensure the content remains both current and accurate. In addition, UpToDate does not accept money from advertisers, so the information is free of commercial bias.

UpToDate is in use in more than 191 countries and has been shown in numerous independent studies to be associated with improved medical knowledge, improved quality of care, reduced complications, reduced medical errors, reduced length of hospital stay, reduced cost, and lowered mortality. There is no other resource that offers UpToDate's breadth of content, synthesized information, and organized, searchable format. **UpToDate is a proprietary product of UpToDate Inc., USA and they are the sole source provider of above-described services.**
